Profiles: [LinkedIn](#) | [Tableau](#) | [GitHub](#)

SUMMARY

Morgan is an Engineering and Analytics Consultant with expertise in data visualisation, ETL, and pipeline development across various industries (Finance, Logistics, NGO, TMT, FMCG). Recognised by Tableau for excellence in visual design, Morgan utilises tools like Tableau, dbt, SQL, and Alteryx to deliver data-driven insights that enhance decision-making. With experience in automating processes, leading impactful projects, Morgan brings a blend of technical skills and consulting expertise to solve complex data challenges.

TECHNICAL SKILLS

ETL/ELT, dbt, SQL (Snowflake, Oracle, MySQL, PostgreSQL), Alteryx (Designer, Server), Python, Engineering, Visualisation, Tableau (Desktop, Server, Cloud, Prep), Microsoft Power BI, Git Principles, AWS, Salesforce, Excel, Cloud Warehousing

EXPERIENCE

Data Analytics and Visualisation Consultant (2022) | Data Engineering Consultant (2025)

Dec 22

The Information Lab, Consultancy, 28+12 Month Contract

- Present

- Undertook a highly competitive analytics training program with one of the UK's top data analytics consultancies.
- Recognised and awarded Viz of the Day for exceptional data visualisation by Tableau, ranked as a top 1000 Tableau Public user in terms of public dashboard favourites.
- Produced award-winning Power BI dashboards based on survey data for a FMCG, luxury consumer brand, measuring customer purchasing attitudes and behaviours.
- Led an 8-member team to deliver four performance and insights dashboards for an international banking client, allowing for data-driven decision-making.
- Developed a Sustainable Development Goals (SDG) dashboard for an NGO, presented at the United Nations, showcasing the impact of data in global sustainability initiatives.
- Presented *Utilising Dynamic Workflows in Alteryx* at JP Morgan's annual analytics summit (60+ in attendance) and trained over 50 students in Tableau at Brunel University of London.
- Developed Alteryx Workflows for a Media Company, saving **1.68 FTEs** annually.
- Constructed pipelines to extract data from Mailchimp and Amplitude API's into S3 Buckets and Azure Blobs using python and Airbyte as proof of concept to expand marketing applications internally.

Analytics Engineer

Jun 25

Virgin Media O2, Media and Telecom, 6 Month Contract

- Present

- Retained for a BI decommissioning project set to save **~£4m over 3 years**, successfully migrating multiple teams away from SAP BO and MicroStrategy and into dbt and Tableau – building over 500 optimised models in dbt.
- Constructed metadata extraction macros in dbt to assist in auditing for SOX Application Monitoring, and wrote python scripts to automate several manual processing tasks during the migration, saving several days of work.
- Introduced dbt to several teams, providing ad-hoc in-house training in dbt and Tableau, and initial set-up of projects.

Advanced Analytics and Reporting Analyst

May 24

International Airline Group (IAG) Cargo, Logistics and Operations, 6+3 Month Contract

- Mar 25

- Built SQL models in Oracle to track cargo journeys through 40+ linked events from 5 separate systems through Heathrow and the airport warehouses, streamlining existing models data to reduce data errors (from **40% to <8%**) and query runtime by **+90%**, which greatly improved operational insights, accuracy, and time to insight.
- Developed Tableau dashboards to monitor and analyse cargo performance, allowing stakeholders to identify inappropriate SLA's, optimise warehouse cargo assignments, highlight operational stress points, and improve stakeholder ability to perform root-cause analysis for performance failures.
- Presented project outcomes and dashboards at multiple stakeholder meetings, including IAG's Tech Town Hall (**80+** in attendance) and bi-monthly C-Suite steering groups, enhancing organisation-wide data-driven decision-making.

Business Intelligence Analyst

Apr 23

Paramount Pictures/Viacom CBS, Media and Telecom, 2x 6 Month Contracts

- Apr 24

- Automated data extraction into Snowflake, utilising SQL in the ELT process, reducing manual processing time by 94%, saving **0.6 FTE** annually.
- Designed a suite of Tableau dashboards that improved resource utilisation tracking and analysis, enhancing senior leadership's decision-making ability.
- Redesigned a suite of Tableau dashboards to improve user experience and utilisation of data, reducing time-to-insight and introduction of a major departmental KPI dashboard.
- Created a project management dashboard with custom SQL in Tableau, reducing senior managers' investigation time by 50%, streamlining quarterly presentations and weekly analysis, saving **1.2 FTE** annually.

EDUCATION

BA in Finance; First Class (1st); University of Stirling, Scotland

2017-2021

Awarded Best Undergrad Finance Dissertation: *"The Use of Sentiment Analysis in Forecasting the FTSE100"*

QUALIFICATIONS/AWARDS

- | | |
|--|--|
| - Tableau Certified Data Analyst, 2023 | - Alteryx Designer Advanced, 2024 (Core, 2022) |
| - AWS Cloud Practitioner, 2025 | - Power BI Data Analyst (PL-300), 2024 |
| - dbt Developer, 2025 (fundamentals, 2024) | - Databricks Fundamentals, 2024 |
